

Ensure your industrial dust collector runs smoothly with AJR Filtration's precision-engineered dust cartridge filters. Manufactured in West Chicago, IL, our extensive selection includes flanged, oval, conical, and round (open-open/open-closed/open-closed with bolt hole) styles, each designed for a precise fit in the most common dust collectors. Trust AJR's quality materials and workmanship for optimal system performance.

Customizable Filter Solutions

AJR provides custom filter solutions engineered precisely for your unique application's needs. Construction options include pleat count, pleat depth, hardware materials, gaskets, grounding, outer mesh or outer bands, and a wide array of media and media finish options.
