

AquaTech Water Tanks 200 thru 12,000 Gallon (Tri-Layer available for 200 – 3000 Gallon only)

Tri-Layer AquaTech Features

Rotoplas = Innovation

Rotoplas unique tri-layer AquaTech Tank technology utilizes three innovative technologies to create the most advanced tank on the market.

- A Inside Layer:** Antibacterial coated white layer prevents the growth of algae and allows easy level viewing.
- B Middle Layer:** Solid foam structure provides the structure, support, and rigidity of a honeycomb — leading to a lighter, more durable and more impact resistant tank.
- C Outside Layer:** UV Coated resins block sunlight, preventing unwanted formations and preserving the clean water within.

Tank Specifications

Inlet: 2" Female Threaded NPT Bulkhead Fitting
Outlet: 2" Female Threaded NPT Bulkhead Fitting

The Tri-Layer AquaTech Tank brings new meaning to impact resistance and durability. The three layers of the Tri-Layer AquaTech tank each contribute to the most technologically advanced, most durable, and best made water storage tank available on the market. Tri-Layer AquaTech Tanks are designed to be stronger, last longer, and perform better than any other water storage tank available today. Three Layers:

- **Inside Layer -** Antibacterial coated white layer prevents the growth of algae and allows easy level viewing (viewing through the manway).
- **Middle Layer -** Solid foam structure provides the structure, support, and rigidity of a honeycomb. This leads to a lighter, more durable and more impact resistant tank.
- **Outside Layer -** UV coated resins block sunlight, preventing unwanted formations and preserving the clean water within.
